

A NEW RESEARCH PROJECT AT THE UNIVERSITY OF BARI, ITALY

Title of the project

***“Diffuse Intrinsic Pontine Glioma in Children (DIPG\_C): a diagnostic and therapeutic challenge, from Gene Expression Profile to Drug”***

The project, led by **Professor Maria Grazia Perrone** of the Department of Pharmacological Sciences at the “Aldo Moro” University of Bari (Italy), aims at discovering new drugs for the treatment of the diffuse intrinsic pontine glioma of children, a tumor for which there is currently no effective cure. The two-year project is supported by the Associazione Mia Neri Foundation with a **grant of 50,000 Euros**.
